9 years	**~2M**	**+20%**	**4**
shipping products with real users	users at eJOY English	revenue from a redesigned order flow	products & SaaS built independently

01/ Experience

Product-Backend Owner · TeenCare

2025 - Present

- Partnered directly with the Founder to set priorities around measurable hypotheses: mentor supply → operations (scheduling, attendance, payroll) → Parent App and AI companion for retention
- Built a bilingual VI/EN mentor recruitment funnel across 3 markets with automated reminders, a reapply flow and RBAC; runs network.teencare.co
- Launched Carie, an LLM-powered AI companion that turns mentoring-session data into guidance for parents; automated mentor interviews (Fireflies) and reporting with AI
- Migrated the LMS on live data – hundreds of classes, ~200 active mentors, thousands of enrollments – reconciling Google Meet records before payroll
- Designed a modular-monolith backend (12 PostgreSQL schemas, OpenAPI 3.1), Stripe webhooks, Redis/BullMQ; cut 100-row list load time from 117 ms to 26 ms

Full Stack Developer · Thưởng Trà

2025

- Proposed and built a new ordering flow from a business problem – revenue up 20%
- Built the frontend architecture and database from scratch for both the storefront and internal operations
- Built an order notification system so the ops team handled orders on time; brought AI into team workflows and CI/CD

Full Stack Developer · eJOY English

2018 – 2024

- Worked in a product squad with a PO, BA and Designer, turning learner needs into features in React, Next.js and Vue
- Designed data systems for the CMS, analytics, payments and e-invoicing (API)
- Improved load speed and resolved user-facing incidents at ~2M-user scale; ran CI/CD with GitHub Actions and Railway

02/ Skills

Product

Product discovery • hypotheses & metrics • roadmap prioritization • funnels & retention • SaaS pricing, free trials

AI & Vibe Coding

Cursor • Claude Code • Codex as daily tools. Builds LLM products and AI-automated operations

Build

TypeScript • Next.js • React • Vue • Node.js • NestJS • Strapi • PostgreSQL • Redis • Prisma • Drizzle

Integrations & Ops

Stripe • VietQR/SePay • Zalo ZNS • Google Meet • LiveKit · Docker • GitHub Actions • Cloud Run • Railway • Vercel

03/ Independent products

Class Management

SaaS

Attendance → auto-calculated tuition → VietQR invoice → SePay webhook confirmation → Zalo ZNS reminder. Multi-tenant PostgreSQL RLS, teacher/room conflict checks, 14-day free trial

Carie + Mentor Network

AI

AI companion on the Parent App that supports parents; mentor funnel with an academy and mock calls before mentors take classes

BoxTravel

Creator

Box-Tok – a creator video feed – plus an affiliate portal built for marketers, sellers and creators. Order and customer CRM, tour content CMS

Tree Shop

E-Commerce

Two sales models: quote-on-request for plants, variant-based for supplies. Storefront, server-side checkout, dedicated admin

04/ Education

FPT Aptech

Software developer program

05/ Languages

Vietnamese — Native

English — Fluent technical reading, intermediate conversation
